

## Question ID: 2fec8bf4

### Question

$$P(t) = 1,800(1.02)^t$$

The function  $P$  gives the estimated number of marine mammals in a certain area, where  $t$  is the number of years since a study began. What is the best interpretation of  $P(0) = 1,800$  in this context?

### Answer

- A. The estimated number of marine mammals in the area was **102** when the study began.
- B. The estimated number of marine mammals in the area was **1,800** when the study began.
- C. The estimated number of marine mammals in the area increased by **102** each year during the study.
- D. The estimated number of marine mammals in the area increased by **1,800** each year during the study.
