Question

$2.6 + x = 2.8$

What value of x is the solution to the given equation?

Correct Answer: 0.2, 1/5

Rationale

The correct answer is **.2**. Subtracting **2.6** from each side of the given equation yields $x = \mathbf{0.2}$. Therefore, the value of x that's the solution to the given equation is **0.2**. Note that .2 and 1/5 are examples of ways to enter a correct answer.
