Question

If $\frac{6}{7}p + 18 = 54$, what is the value of $7p$?

Correct Answer: 294

Rationale

The correct answer is **294**. Subtracting **18** from each side of the given equation yields $\frac{6}{7}p = 36$. Multiplying each side of this equation by $\frac{7}{6}$ yields $p = 42$. Multiplying each side of this equation by **7** yields $7p = 294$. Therefore, the value of $7p$ is **294**.
