

Question ID: ee846db7

Question

A store sells two different-sized containers of a certain Greek yogurt. The store's sales of this Greek yogurt totaled **1,277.94** dollars last month. The equation $5.48x + 7.30y = 1,277.94$ represents this situation, where x is the number of smaller containers sold and y is the number of larger containers sold. According to the equation, which of the following represents the price, in dollars, of each smaller container?

Answer

- A. **5.48**
- B. **$7.30y$**
- C. **7.30**
- D. **$5.48x$**
