SAT	Math	Algebra	Linear functions	Easy

Question

The graph of the linear function f is shown, where $y = f(x)$. What is the y -intercept of the graph of f ?

- Answer
- A. $(0, 0)$
 - B. $(0, -\frac{16}{11})$
 - C. $(0, -8)$
 - D. $(0, 8)$

Correct Answer: D

Rationale

Choice D is correct. The y -intercept of a graph is the point where the graph intersects the y -axis. The graph of function f shown intersects the y -axis at the point $(0, 8)$. Therefore, the y -intercept of the graph of f is $(0, 8)$.

Choice A is incorrect. This is the point where the x -axis, not the graph of f , intersects the y -axis.

Choice B is incorrect and may result from conceptual or calculation errors.

Choice C is incorrect and may result from conceptual or calculation errors.
