Question

$f(x) = 7x + 1$

The function gives the total number of people on a company retreat with x managers. What is the total number of people on a company retreat with **7** managers?

Correct Answer: 50

Rationale

The correct answer is **50**. It's given that the function f gives the total number of people on a company retreat with x managers. It's also given that **7** managers are on the company retreat. Substituting **7** for x in the given function yields $f(7) = 7(7) + 1$, or $f(7) = 50$. Therefore, there are a total of **50** people on a company retreat with **7** managers.
