SAT	Math	Algebra	Systems of two linear equations in two variables	Easy

Question

The graph of a system of linear equations is shown. What is the solution (x, y) to the system?

- Answer**
- A. $(0, -7)$
 - B. $(0, -3)$
 - C. $(-4, -3)$
 - D. $(-4, 0)$

Correct Answer: C

Rationale

Choice C is correct. The solution to a system of linear equations is represented by the point that lies on the graph of each equation in the system, or the point where the lines intersect on a graph. On the graph shown, the two lines intersect at the point $(-4, -3)$. Therefore, the solution to the system is $(-4, -3)$.

Choice A is incorrect. This is the y-intercept of the graph of one of the lines shown, not the intersection point of the two lines.

Choice B is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect and may result from conceptual or calculation errors.
