Question

$$\begin{aligned}3x &= 12 \\ -3x + y &= -6\end{aligned}$$

The solution to the given system of equations is (x, y) . What is the value of y ?

Answer

- A. **−3**
- B. **6**
- C. **18**
- D. **30**

Correct Answer: B

Rationale

Choice B is correct. Adding the second equation in the given system to the first equation in the given system yields $3x + (-3x + y) = 12 + (-6)$, which is equivalent to $y = 6$.

Choice A is incorrect and may result from conceptual or calculation errors.

Choice C is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect and may result from conceptual or calculation errors.
