Question

$$x + 3y = 29$$
$$3y = 11$$

The solution to the given system of equations is (x, y) . What is the value of x ?

Correct Answer: 18

Rationale

The correct answer is **18**. It's given by the second equation in the system that **$3y = 11$** . Substituting **11** for **$3y$** in the first equation in the system, **$x + 3y = 29$** , yields **$x + 11 = 29$** . Subtracting **11** from both sides of this equation yields **$x = 18$** .
