Question

Each side of a square has a length of 45. What is the perimeter of this square?

Correct Answer: 180

Rationale

The correct answer is 180. The perimeter of a polygon is equal to the sum of the lengths of the sides of the polygon. It’s given that each side of the square has a length of 45. Since a square is a polygon with 4 sides, the perimeter of this square is 45 + 45 + 45 + 45, or 180.
