Question

What is the area of a rectangle with a length of **17 centimeters (cm)** and a width of **7 cm**?

Answer

- A. **24 cm²**
- B. **48 cm²**
- C. **119 cm²**
- D. **576 cm²**

Correct Answer: C

Rationale

Choice C is correct. The area of a rectangle with length *l* and width *w* can be found using the formula ***A = lw***. It’s given that the rectangle has a length of **17 cm** and a width of **7 cm**. Therefore, the area of this rectangle is ***A = 17(7)***, or **119 cm²**.

Choice A is incorrect. This is the sum of the length and width of the rectangle, not the area.

Choice B is incorrect. This is the perimeter of the rectangle, not the area.

Choice D is incorrect. This is the sum of the length and width of the rectangle squared, not the area.
