Question

The figure shows the lengths, in centimeters (cm), of the edges of a right rectangular prism. The volume  $V$  of a right rectangular prism is  $\ell wh$ , where  $\ell$  is the length of the prism,  $w$  is the width of the prism, and  $h$  is the height of the prism. What is the volume, in cubic centimeters, of the prism?

Answer

- A. 36
- B. 24
- C. 12
- D. 11

Correct Answer: A

Rationale

Choice A is correct. It’s given that the volume of a right rectangular prism is  $\ell wh$ . The prism shown has a length of 6 cm, a width of 2 cm, and a height of 3 cm. Thus,  $\ell wh = (6)(2)(3)$ , or 36 cubic centimeters.

Choice B is incorrect. This is the volume of a rectangular prism with edge lengths of 6, 2, and 2. Choice C is incorrect and may result from only finding the product of the length and width of the base of the prism. Choice D is incorrect and may result from finding the sum, not the product, of the edge lengths of the prism.
