

Question ID: 9fec9d49

Question

The floor of a ballroom has an area of **600** square meters. An architect creates a scale model of the floor of the ballroom, where the length of each side of the model is $\frac{1}{10}$ times the length of the corresponding side of the actual floor of the ballroom. What is the area, in square meters, of the scale model?

Answer

- A. **6**
- B. **10**
- C. **60**
- D. **150**
