Question

The bar graph summarizes the charge, in kilowatt-hours (**kWh**), a battery received each day for **15** days.

For how many of these **15** days did the battery receive a charge of **0 kWh**?

Answer

- A. 0
- B. 1
- C. 4
- D. 6

Correct Answer: D

Rationale

Choice D is correct. It's given that the bar graph summarizes the charge, in kilowatt-hours (**kWh**), a battery received each day for **15** days. The height of each bar in the bar graph shown represents the number of days the battery received the charge, in **kWh**, specified at the bottom of the bar. The bar for a charge of **0 kWh** reaches a height of **6**. Therefore, the battery received a charge of **0 kWh** for **6** of these days.

Choice A is incorrect. This is the charge, in **kWh**, that the battery received, not the number of days the battery received this charge.

Choice B is incorrect. This is the number of days the battery received a charge of either **8**, **16**, or **23 kWh**.

Choice C is incorrect. This is the number of days the battery received a charge of **11 kWh**.
