Question

73, 74, 75, 77, 79, 82, 84, 85, 91

What is the median of the data shown?

Correct Answer: 79

Rationale

The correct answer is **79**. The median of a data set with an odd number of values is the middle value of the set when the values are ordered from least to greatest. Because the given data set consists of nine values that are ordered from least to greatest, the median is the fifth value in the data set. Therefore, the median of the data shown is **79**.
