Question

4, 4, 4, 4, 8, 8, 8, 13, 13

Which frequency table correctly represents the data listed?

Answer

A.

| Number | Frequency |
|--------|-----------|
| 4      | 4         |
| 8      | 3         |
| 13     | 2         |

B.

| Number | Frequency |
|--------|-----------|
| 4      | 4         |
| 3      | 8         |
| 2      | 13        |

C.

| Number | Frequency |
|--------|-----------|
| 4      | 16        |
| 8      | 24        |
| 13     | 26        |

D.

| Number | Frequency |
|--------|-----------|
| 16     | 4         |
| 24     | 8         |
| 26     | 13        |

Correct Answer: A

Rationale

Choice A is correct. A frequency table is a table that lists the data value and shows the number of times the data value occurs. In the data listed, the number **4** occurs four times, the number **8** occurs three times, and the number **13** occurs two times. This corresponds to the table in choice A.

Choice B is incorrect. This table has the values for number and frequency reversed.

Choice C is incorrect because the frequency values don't represent the data listed.

Choice D is incorrect. This table represents the listed number values as the frequency values.
