Question
The bar graph shows the number of each type of monkey in a sanctuary.

How many more vervets are in this sanctuary than mandrills?

- Answer**
- A. 11
 - B. 6
 - C. 5
 - D. 3

Correct Answer: B

Rationale
Choice B is correct. It's given that the bar graph shows the number of each type of monkey in a sanctuary. The bar representing the number of mandrills has a height of 5; therefore, there are 5 mandrills in the sanctuary. The bar representing vervets has a height of 11; therefore, there are 11 vervets in the sanctuary. Therefore, there are 11 – 5, or 6, more vervets in this sanctuary than mandrills.

Choice A is incorrect. This is the number of vervets in the sanctuary.

Choice C is incorrect. This is the number of mandrills in the sanctuary.

Choice D is incorrect and may result from conceptual or calculation errors.
