Question

Data set A has **15** values and is represented by the dot plot shown. Data set B is created by adding **46** to each of the values in data set A. Which of the following correctly compares the medians and the ranges of data sets A and B?

Answer

- A. The median of data set B is greater than the median of data set A, and the range of data set B is equal to the range of data set A.
- B. The median of data set B is greater than the median of data set A, and the range of data set B is greater than the range of data set A.
- C. The median of data set B is equal to the median of data set A, and the range of data set B is greater than the range of data set A.
- D. The median of data set B is equal to the median of data set A, and the range of data set B is equal to the range of data set A.
