Question

Amara grows cherry tomatoes in her backyard. This year, she harvested **750** cherry tomatoes and gave **10%** of them to her neighbor. How many of the harvested cherry tomatoes did Amara give to her neighbor?

Correct Answer: 75

Rationale

The correct answer is **75**. It's given that Amara harvested **750** cherry tomatoes and gave **10%** of them to her neighbor. **10%** can be written as $\frac{10}{100}$, or **0.1**. Therefore, the number of cherry tomatoes that Amara gave to her neighbor can be calculated by multiplying the total number of cherry tomatoes by **0.1**, which gives **(0.1)(750)**, or **75**.
