Question

The length of the base of a certain parallelogram is **89%** of the height of the parallelogram. Which expression represents the length of the base of the parallelogram, where *h* is the height of the parallelogram?

Answer

- A. **89*h***
- B. **0.089*h***
- C. **8.9*h***
- D. **0.89*h***

Correct Answer: D

Rationale

Choice D is correct. It's given that the length of the base of the parallelogram is **89%** of the height of the parallelogram. Since *h* is the height of the parallelogram, it follows that the length of the base of the parallelogram can be represented by the expression $\frac{89}{100}h$, or **0.89*h***.

Choice A is incorrect. This expression represents **8,900%**, not **89%**, of the height of the parallelogram.

Choice B is incorrect. This expression represents **8.9%**, not **89%**, of the height of the parallelogram.

Choice C is incorrect. This expression represents **890%**, not **89%**, of the height of the parallelogram.
