Question

During the first month of sales, a company sold 1,300,000 units of a certain type of smartphone. During the same month, 15% of the units sold were returned. If sales and the return rate remain the same for each of the next 5 months, about how many units of this smartphone will be returned to the company during this 6-month period?

Answer

- A. 195,000
- B. 975,000
- C. 1,170,000
- D. 6,630,000

Correct Answer: C

Rationale

Choice C is correct. Of the 1,300,000 units sold during the first month, 15% were returned, so $(1,300,000)(0.15) = 195,000$ units were returned during the first month. If the units were sold and returned at the same rate for the next 5 months, then a total of $(195,000)(6) = 1,170,000$ smartphone units were returned during the 6-month period.

Choice A is incorrect. This is the number of units that were returned in 1 month. Choice B is incorrect. This is the number of units that were returned in 5 months. Choice D is incorrect. This is the number of units sold and not returned during the first 6 months.
