Question

The table summarizes the number of objects in each group.

Group	Number of objects
A	375
B	54
C	690
D	81
Total	1,200

The number of objects in group C is $p\%$ of the number of objects in group A. What is the value of p ?

Correct Answer: 184

Rationale

The correct answer is **184**. It's given in the table that there are **375** objects in group A and **690** objects in group C. It's also given that the number of objects in group C is $p\%$ of the number of objects in group A. Therefore, **690** is $p\%$ of **375**, which can be represented by $690 = (\frac{p}{100})(375)$, or $690 = 3.75p$. Dividing both sides of this equation by **3.75** yields $184 = p$. Therefore, the value of p is **184**.
