Question

The amount of Hanna's bill for a food order was **\$50**. Hanna gave a tip of **20%** of the amount of the bill. What is the amount, in dollars, of the tip Hanna gave?

Correct Answer: 10

Rationale

The correct answer is **10**. It's given that the amount of Hanna's food order was **\$50** and that Hanna gave a tip of **20%** of the amount of the bill. **20%** of **50** can be calculated as $(\frac{20}{100})(50)$, which yields $\frac{1000}{100}$, or **10**. Therefore, the amount, in dollars, of the tip Hanna gave is **10**.
