

Question ID: 9ce8cbbe

Question

Set K consists of all the positive integers that are less than or equal to **160**, where none of the integers are repeated. If a number is selected at random from set K, what is the probability of selecting a number that is even and less than or equal to **50**?

Answer

A. $\frac{5}{32}$

B. $\frac{3}{16}$

C. $\frac{5}{21}$

D. $\frac{5}{16}$
