Question
A customer spent **\$27** to purchase oranges at **\$3** per pound. How many pounds of oranges did the customer purchase?

Correct Answer: 9

Rationale
The correct answer is **9**. It’s given that the customer spent **\$27** to purchase oranges at **\$3** per pound. Therefore, the number of pounds of oranges the customer purchased is $\$27\left(\frac{1\text{ pound}}{\$3}\right)$, or **9** pounds.
