Question

An object's speed is **64 yards** per second. What is the object's speed, in feet per second? (**1 yard = 3 feet**)

Answer

- A. **61**
- B. **67**
- C. **94**
- D. **192**

Correct Answer: D

Rationale

Choice D is correct. Since **1** yard is equal to **3** feet, **64** yards is equal to **64 yards**($\frac{3 \text{ feet}}{1 \text{ yard}}$), or **192** feet. It follows that **64** yards per second is equivalent to **192** feet per second. Therefore, the object's speed is **192** feet per second.

Choice A is incorrect. A speed of **61** feet per second is equivalent to $\frac{61}{3}$, not **64**, yards per second.

Choice B is incorrect. A speed of **67** feet per second is equivalent to $\frac{67}{3}$, not **64**, yards per second.

Choice C is incorrect. A speed of **94** feet per second is equivalent to $\frac{94}{3}$, not **64**, yards per second.
