

Question ID: d6121490

Question

The graph above shows the relationship between the speed of a particular car, in miles per hour, and its corresponding braking distance, in feet. Approximately how many feet greater will the car’s braking distance be when the car is traveling at 50 miles per hour than when the car is traveling at 30 miles per hour?

Answer

- A. 75
- B. 125
- C. 175
- D. 250
