

Question

The scatterplot shows the relationship between two variables,  $x$  and  $y$ . An equation for the exponential model shown can be written as  $y = a(b)^x$ , where  $a$  and  $b$  are positive constants. Which of the following is closest to the value of  $b$ ?

- Answer**
- A. 0.83
  - B. 1.83
  - C. 18.36
  - D. 126.35
