Question

In the 1990s, conservationists began planting more than 500,000 native trees in the habitat of the Azores bullfinch to boost the bird’s numbers. This approach was apparently ____: the Azores bullfinch’s population size increased from as few as 100 birds at the end of the 1980s to around 1,300 in 2023.

Which choice completes the text with the most logical and precise word or phrase?

- Answer**
- A. amusing
 - B. costly
 - C. successful
 - D. disastrous

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of the conservationists’ efforts to increase Azores bullfinch’s numbers. In this context, "successful" means accomplishing a goal or purpose. According to the text, conservationists planted more than 500,000 native trees in an Azores bullfinch habitat in order to boost the bird’s population size. The text then indicates that the population size did indeed grow as a result of the planted trees. Thus, in this context, the conservationists’ approach of planting native trees was successful because it achieved the goal of increasing the bird’s population size.

Choice A is incorrect because the text gives no indication that the conservationists’ approach of planting native trees to increase Azores bullfinch’s numbers was "amusing," or comical or entertaining. Instead, the approach was seriously undertaken and ultimately accomplished. Choice B is incorrect because the text doesn’t address how much it cost to achieve the goal of planting native trees to increase Azores bullfinch’s numbers. The text indicates that the approach was beneficial and successful rather than "costly," or expensive or harmful. Choice D is incorrect. According to the text, the conservationists’ approach of planting native trees to increase Azores bullfinch’s numbers was beneficial and successful rather than "disastrous," or damaging or unsuccessful.
