Question

The familial structure of the black swan (*Cygnus atratus*) shows tremendous _____. breeding pairs with demonstrated success in rearing cygnets (young swans) have been observed to foster those of less successful pairs, and while rearing by female-male pairs is most common, male-male pairs sometimes rear cygnets too, achieving a significantly higher rate of survival to adulthood than female-male pairs.

Which choice completes the text with the most logical and precise word or phrase?

Answer

- A. cohesion
- B. elasticity
- C. affection
- D. reciprocity
