Question

While researching a topic, a student has taken the following notes:

- Dr. Sunil Bajpai studies dinosaurs at the Indian Institute of Technology.
- Bajpai’s research team recently found a 167-million-year-old dicraeosaurid fossil.
- It is the oldest fossil from the dicraeosaurid dinosaur group ever recovered.
- It was found in the Thar Desert in western India.

The student wants to indicate where the dicraeosaurid fossil was found. Which choice most effectively uses relevant information from the notes to accomplish this goal?

Answer

- A. The dicraeosaurid fossil was found in western India’s Thar Desert.
- B. Bajpai’s team recently found the oldest dicraeosaurid fossil ever recovered.
- C. Dr. Sunil Bajpai, of the Indian Institute of Technology, is part of a research team.
- D. The fossil, which is from the dicraeosaurid dinosaur group, is 167 million years old.

Correct Answer: A

Rationale

Choice A is the best answer. The sentence indicates where the dicraeosaurid fossil was found: western India’s Thar Desert.

Choice B is incorrect. The sentence states that Bajpai’s team discovered the dicraeosaurid fossil; it doesn’t specify where they found it. Choice C is incorrect. The sentence provides information about Dr. Sunil Bajpai; it doesn’t indicate where the fossil was found. Choice D is incorrect. While the sentence provides information about the fossil, it doesn’t indicate where the fossil was found.
