

Question ID: 7fa2b1ee

Question

While researching a topic, a student has taken the following notes:

- In meteorology, an air mass is a large body of air with generally uniform humidity and temperature.
- Air masses are commonly classified by two-letter names.
- The first letter indicates the humidity of the air mass, while the second letter indicates the temperature.
- cA (continental arctic) means dry and cold, for example.
- mT (maritime tropical) means moist and warm.
- This classification system is based on the work of a Swedish meteorologist named Tor Bergeron (1891–1977).

The student wants to provide an example of an air mass. Which choice most effectively uses relevant information from the notes to accomplish this goal?

Answer

- A. Air masses are large bodies of air with generally uniform humidity and temperature.
- B. The air mass classification system uses two-letter names and is based on the work of Tor Bergeron, a Swedish meteorologist.
- C. Air masses are commonly classified by a two-letter name that indicates humidity and temperature.
- D. One type of air mass is known as a cA, or continental arctic, air mass because it is dry and cold.
