

Question ID: 04ad68ca

Question

In Gothic architecture, flying buttresses are large arches that help support a building's exterior walls. Before the Gothic era, cathedrals' heavy ceilings had to be supported by thick, short walls, but the invention of flying buttresses eliminated this need. _____ Gothic cathedrals could be built with thinner, higher walls.

Which choice completes the text with the most logical transition?

Answer

- A. Similarly,
- B. For instance,
- C. Nevertheless,
- D. As a result,
