Question

In most deer species, males grow antlers, and females don't. _____ reindeer are different. They are the only deer species in which the females grow antlers, too.

Which choice completes the text with the most logical transition?

Answer

- A. Similarly,
- B. Next,
- C. However,
- D. Thus,

Correct Answer: C

Rationale

Choice C is the best answer. "However" logically signals that the claim about reindeer in this sentence contrasts with the information about most deer species in the previous sentence.

Choice A is incorrect because "similarly" illogically signals that the claim in this sentence is similar to the previous information about most deer species. Instead, it contrasts with that information. Choice B is incorrect because "next" illogically signals that the claim about reindeer in this sentence is the next step in a process. Instead, it contrasts with the previous information about most deer species. Choice D is incorrect because "thus" illogically signals that the claim in this sentence results from the previous information about most deer species. Instead, it contrasts with that information.
