Question

According to Duverger’s law, countries with single-ballot majoritarian elections for single-member districts tend to polarize into two-party systems, wherein dueling political parties consistently dominate the political system. _____ countries with proportional-representation electoral systems tend to support multi-partyism, under which power gets distributed among many political parties.

Which choice completes the text with the most logical transition?

Answer

- A. Subsequently,
- B. Conversely,
- C. For instance,
- D. In other words,

Correct Answer: B

Rationale

Choice B is the best answer. "Conversely" logically signals that the information in this sentence—that countries with proportional-representation electoral systems tend toward multi-partyism—contrasts with the previous information about countries with single-ballot majoritarian elections, which tend to have two-party systems.

Choice A is incorrect because "subsequently" illogically signals that the information in this sentence about countries with proportional-representation electoral systems occurs later in a chronological sequence of events than the information in the previous sentence. Instead, it contrasts with the previous information. Choice C is incorrect because "for instance" illogically signals that the information in this sentence about countries with proportional-representation electoral systems is an example supporting the previous statement about countries with single-ballot majoritarian elections. Instead, it contrasts with the previous statement. Choice D is incorrect because "in other words" illogically signals that the information in this sentence about countries with proportional-representation electoral systems is a paraphrase or restatement of the previous information about countries with single-ballot majoritarian elections. Instead, it contrasts with the previous information.
